THE SOURCE EVALUATIONS IN THIS REPORT ARE DEFINITIVE.
THE APPRAISAL OF CONTENT IS TENTATIVE.
(FOR KEY SEE REVERSE)

1. The Starowska wharf in Szczecin (Stettin) is about 300 meters in length and at least 6 meters in depth. It is constructed of concrete with wooden pilings. These pilings are placed in at a slant, but repairs and alterations are in progress to make the wharf vertical. There are five cranes of two to three tons on tracks located on the wharf. Three of these are bridge cranes. 25X1
2. In the canal, southwest of the Starowska wharf, at the second bridge from the north, new bridge abutments are being constructed to replace the ones which were destroyed during the war (see the attached sketch).
3. At the Szczecin Shipyard (Stocznia Szczecinska) two newly constructed merchant ships were being fitted out.
